## unlocking barriers

No matter how ignorant we have become towards our environment. These little ones do care

Did you ever think what will happen if there is no water to drink, no food to eat and no fresh air to breathe? May be you do not!

But for these little ones, the thought in itself is very haunting. And to deal with environment pollution is a big challenge today. With a similar concern, the students of a grooming academy—Magic Creations drew attention towards these life-threatening issues through a skit presented on Sunday at their campus in Mahaveer Nagar. Agar paani khatam hoga to kya hoga?, Hariyali nahi hogi to shudh hawa kaise aayegi...? Such were the questions posed by the students through their performances.

Next came the play—Aao Sunai Ek kahani, in which these amateur artists with help of catchy dialogues and creative masks presented a well appreciated play. This surely makes us recall that though the nani ki kahaniyaan are disappearing from the scene, but with such story telling sessions, the age-old tradition was once again revived.

They also made a pledge to be environments best friend through the short play conducted in the direction of theatre artist Babita Madan. Another performance was of a play—Ek saath to fikar not, showed their creative side too. “The aim is to unlock the creative expression of a child and give him an exposure of art and literature,” says Geetika Goyal, director, Magic Creations.

The aim is to  
unlock the  
creative  
expression  
of a child  
and give him  
an exposure  
of art and  
literature
